Journal of Wind Engineering and Industrial Aerodynamics

Contents Volume 34 (1990)

Vol. 34 No 1

Performance characteristics of a reciprocating wind machine
S.B. Kedare and A.W. Date (Bombay, India) 1
Wind effects on structural intersections
T.A. Fox and N. Toy (Guildford, U.K.) 27
Fatigue design of large wind energy conversion systems and operational experience from the Swedish prototypes
A.F. Blom (Bromma, Sweden), P. Svenkvist (Kristinehamn, Sweden) and S.-E. Thor (Bromma, Sweden) 45
Wind loads on circular storage bins, silos and tanks. II. Effect of grouping
P.A. Macdonald (Neutral Bay, NSW, Australia), J.D. Holmes (Highett, Victoria, Australia) and K.C.S. Kwok (Sydney, NSW, Australia) 77

Short Communication
Vortex shedding from an H-section prism
T. Nakagawa (Göttingen, F.R.G.) 97

Discussion
Comments on "Prediction of the wind-generated pressure distribution around buildings" by E.H. Mathews
P.J. Richards (Auckland, New Zealand) and B.A. Younis (London, U.K.) 107

Reply
Reply to the comments of P.J. Richards and B.A. Younis on the manuscript "Prediction of the wind-generated pressure distribution around buildings" by E.H. Mathews
E.H. Mathews (Pretoria, South Africa) 111

Vol. 34 No 2

Effect of perforated plates on wide-angle diffuser-exit velocity profiles
B. Şahin (Adana, Turkey) and A.J. Ward-Smith (Uxbridge, U.K.) 113
Aerodynamic behaviour of a square cylinder placed in a turbulent plane mixing layer
S. Taniguchi (Kitami, Japan) 127
The effectiveness of anti-downdraught domestic chimney pots in preventing smoke blow-back
C.J. Carpenter (Coventry, U.K.) 147
The propagation of internal pressures in buildings
R.I. Harris (Bedford, U.K.) 169

0167-6105/90/$03.50 © 1990—Elsevier Science Publishers B.V.

Technical and economic considerations for the design of optimum wind energy conversion systems
N. Galanis (Sherbrooke, Que., Canada) and C. Christophides (Toronto, Ont., Canada) 185
First passage probability of a linear oscillator with probabilistic barriers
H.S. Zibdeh and I.M. Janajreh (Irbid, Jordan) 197
Vortex shedding from groups of three and four equispaced cylinders situated in a cross flow
A.T. Sayers (Rondebosch, South Africa) 213

Vol. 34 No. 3

Snow drifts on flat roofs: wind tunnel tests and field measurements
F.Da Matha Sant'Anna and D.A. Taylor (Ottawa, Ont., Canada) 223
The effect of atmospheric turbulence on trains
C.G. Robinson and C.J. Baker (Nottingham, U.K.) 251
The aerodynamic drag of high speed trains
N.J.W. Brockie and C.J. Baker (Nottingham, U.K.) 273
Use of video camera recording and digital image processing for the analysis of pollutant dispersion in the near wake of a cube
D. Olivari and V. Babuska (Rhode Saint Genèse, Belgium) 291
Self-excited oscillation of a pretensioned cable roof with single curvature in smooth flow
T. Matsumoto (Kanazawa, Japan) 303
Wind loads on circular storage bins, silos and tanks. III. fluctuating and peak pressure distributions
P.A. Macdonald (Sydney, NSW, Australia), J.D. Holmes (Highett, Vic., Australia) and K.C.S. Kwok (Sydney, NSW, Australia) 319

Discussion

Comments on "3-D numerical simulation of airflow around a cubic model by means of the k-ϵ model" by S. Murakami and A. Mochida
A. Baskaran and T. Stathopoulos (Montreal, Que., Canada) 339

Reply

Reply to the comments by A. Baskaran and T. Stathopoulos on "3-D numerical simulation of airflow around a cubic model by means of the k-ϵ model" by S. Murakami and A. Mochida
